EDUCATION

BRAC University Dhaka, Bangladesh

BSc in Computer Science and Engineering | GPA: 3.48 *May 2022 - May 2026*

Relevant Coursework: Data Structures, Algorithms, Computer Networks

Birshrestha Noor Mohammad Public College Dhaka, Bangladesh

Higher Secondary Certificate (HSC) | GPA: 5.00/5.00 *2021*

Secondary School Certificate (SSC) | GPA: 4.90/5.00 *2019*

EXPERIENCE

EcoIntuition Academy Remote

Data Science Intern *August 2024 – Present*

- Develop and structure academic courses by organizing modules, lessons, learning materials, examples, and technical content to create clear and engaging learning experiences.
- Design and refine course content with practical examples, visualizations, and interactive learning components to improve the accessibility of technical concepts.
- Perform Exploratory Data Analysis (EDA) on project datasets through data cleaning, visualization, and extraction of meaningful insights to support data-driven decisions.

PROJECTS

Home Management System GitHub

Full-Stack Web Application | React, Vite, Node.js, Express.js, MongoDB

- Developed a full-stack home and property management platform with separate functionality for property owners and tenants using React and Node.js.
- Built a RESTful backend with Express.js and MongoDB, incorporating JWT-based authentication, property and tenant management, file uploads, and protected application routes.
- Implemented an automated rent and invoice management system with Stripe payment integration, monthly invoice generation, payment tracking, and transaction history.

Uber Fare Prediction GitHub

Machine Learning Project | Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Analyzed and preprocessed approximately 200,000 Uber trip records through missing-value handling, outlier filtering, exploratory data analysis, and feature scaling.
- Engineered temporal and geographic features, including pickup hour, weekday, month, and Haversine trip distance, to improve fare prediction.
- Trained and compared Linear Regression, Random Forest, and Gradient Boosting models, with Gradient Boosting achieving the best performance at an R^2 of 0.74 and RMSE of 4.94.

SKILLS

Languages: Python, HTML, CSS, JavaScript, C, C++, R

Technical Skills: GUI Development in Python, Data Analysis, Data Visualization, Data Cleansing, Data Management
